

P.A.R.T.Y. is run at three major metropolitan hospitals - Royal Adelaide Hospital, Flinders Medical Centre and Lyell McEwin Hospital. Programs are also run in various regional areas across the State.

P.A.R.T.Y.
is the **Prevent Alcohol and Risk-related Trauma in Youth Program** - an injury awareness and prevention program. It is a dynamic, interactive, educational initiative designed for young people between the ages of 15-19 years old.

P.A.R.T.Y. Program
was originally established in Canada in 1986. It is an international program that runs across 150 global sites.

P.A.R.T.Y. Program
aims to show students first hand some of the tragic consequences that can occur if they participate in risk-taking behaviour, as well as the choices they can make to avoid trauma and injury.

SOUTH AUSTRALIA OFFERS 4 DIFFERENT P.A.R.T.Y. PROGRAMS

One choice could change your life. Forever.

The P.A.R.T.Y. Program is having a positive impact on the SA community as a whole by contributing to the reduction of high risk decision making, therefore reducing high impact consequences. In turn this reduces financial impact and strain on the health sector. The program aims to decrease the number of traumatic incidents, reduce hospital admission in this age group and most importantly save lives.

IN 2022

**P.A.R.T.Y. PROGRAM
RAN 53 PROGRAMS**

44 IN THE
METROPOLITAN AREA

9 IN THE
REGIONAL AREAS

REGIONAL AREAS

IN 2022

**WE REACHED
1016 STUDENTS**

IN 2023

**WE AIM TO REACH
1700 STUDENTS**

Do you feel more
connected to your
community because of
the P.A.R.T.Y. Program?

The P.A.R.T.Y. Program is a not-for-profit organisation. The Program does not charge any student or school to participate. Any school can register their interest to book a program.

Do you think the P.A.R.T.Y. Program will make a
difference to the way you think about your actions
in the future?

The program collects data from students pre-program, post-program and 16 weeks after the program. Our data reflects a positive change in students aptitudes towards risk taking behaviour

After participating in the P.A.R.T.Y. Program 93.7% of students said they felt empowered to make good choices.

99.5% of students stated that they now understand what constitutes a high impact risk.

"I strongly believe that the P.A.R.T.Y. program was highly successful at educating and empowering young adults to use risk minimisation strategies to prevent drug-driving injury and trauma. I hope to utilise my newly developed understanding of the effects and consequences of drug driving to mitigate any harm to others or myself in the future."

(Marden Senior College, Year 11)

"I learned that every risk will have consequences on me, my friends/family and strangers"

"When I am put into a situation or see my friends in a situation where they may choose a risky behaviour, I will now more deeply reflect on the consequences and choose a safer option"

Since participating in the P.A.R.T.Y. Program 4 months prior, 84% of students agreed they felt more empowered to make good choices
